To Whom It May Concern:

Gerard Trombino was the Project Manager for work done on my house during the last 18 months. There were two distinct projects and each one, although very different in nature, were completed to my satisfaction. This was due to his hands on supervision of very talented workmen that completed each task in a timely fashion with great expertise.

The first project consisted of many small things that needed to be done at the house which included:

- Repairing and painting a ceiling in our family room which had water damage
- Replacing the area of the roof that was causing the water damage
- Installing new floor tile in my entrance area
- Installing new floor tile around my fireplace

The second project was a much larger undertaking. We noticed water seepage in our basement and this was due to cracks in the foundation of the house. The whole foundation needed to be re-cemented, water proofed and the stucco replaced. The inside wall in the basement was repaired and a new wall erected to replace the old one. I needed the work completed by Thanksgiving since my whole family was coming to visit. He kept his word and all the work was done in time!

Gerard is open and honest and explains everything that needs to be done and why. He treats his employees with respect and consequently they go the extra mile for him. I keep him on speed dial because I know no matter how small the job he will stop by the house and see how he can help us.

I highly recommend Gerard Trombino and if you would like to contact me for more information please feel free to call me at 516 993-0052.

Warm regards,

Diane Foley
